THE OFFICIAL BASEBALL GLOVE, GAME BALL,
BASE SUPPLIER, HELMET AND FACE GUARD OF
MAJOR LEAGUE BASEBALL®

REVIX®

It's time for a defensive REVolution to America's pastime. With advanced stats and data available like never before, the game is rapidly changing. Now, there's 1 glove changing how you field too. Forget everything you know about traditional ball gloves and open your eyes to the neXt generation of glove design: introducing the Rawlings REVIX.

After several years secretly researching and developing cutting edge technology, the REVIX was born. Countless hours in the lab deconstructing past glove designs, evaluating new game-changing technologies, and engineering incredibly scientific build and design processes with the highest performance materials led to a breakthrough. An ultra-lightweight, form-fitting, game-ready glove that gives you consistently unmatched playability across the field. The Rawlings REVIX rewrites glove history, while shaping its future. Join the REVolution now with the Rawlings REVIX!

- Infused with Carbon's Digital Light Synthesis™ (DLS™) technology you get a perfect 3-D shape, thinner - yet sturdier - padding, and a sleek profile that won't break down over time.
- Constructed with an optimized lattice structure, the REVIX provides variable stiffness in the thumb and pinky, which significantly reduces weight without sacrificing protection or durability.
- Innovative, lace-less web design eliminates top-of-the-web lacing, resulting in improved fielding ability.

- Adaptive fit system encompasses a wider range of wrist sizes for a snug, tailored 'custom' fit.
- Crafted with world-renowned Heart of the Hide® palm leather padding recognized for its quality and authenticity.
- Advanced manufacturing processes and materials ensure immediate and consistent performance.

NEW YORK YANKEES®

HEART OF THE HIDE® TRADITIONAL

For more than 65 years, Rawlings Heart of the Hide® gloves have been a staple for many of baseball's most well-known pros, and that tradition continues today. Our Heart of the Hide traditional gloves feature all the same premium materials you expect in a pro model glove - high quality US steerhide leather that forms to the perfect shape and pocket, deer tanned cowhide palm lining and soft full-grain finger back linings for ultimate comfort and pro grade leather laces for durability and strength. Marked by established pro patterns and classic color ways, these gloves pay homage to the rich history of Rawlings gloves while incorporating the latest technology and performance attributes - the best of both worlds.

ENCORE

Just when you thought leather couldn't have technology here it is—cue the Encore! Finally a glove technology you can see and feel, this web and pocket combination is bound to be a fan favorite. Its bolstered base design prevents against sting thanks to the added protection in the palm area. Additionally, its inventive web construction and deep pocket allows the fingers to close around the web, keeping the shape of the pocket intact. Worthy of an encore, it will be the glove you come back to again and again.

- Patented web construction and deeper pocket allow fingers to close around the web
- Extended base design prevents against sting having added protection in the palm area
- Overall design promotes faster break in and easier close while still holding shape
- Adjustable hand opening for a custom fit

THE FUTURE OF COMPOSITE TECHNOLOGY

3D ROPECOIL COMPOSITE TECHNOLOGY = MAX PERFORMANCE, NO BREAK-IN REQUIRED

3D ROPECOIL COMPOSITE TECHNOLOGY

CONNEXION Max

OPTI-FLEX HANDLE

Revolutionary barrel design in which 3-dimensional composite rope is wrapped vertically around the barrel at the sweet spot, coupled with optimized composite barrel thickness towards the end cap and taper, to create an expanded and maximum performing sweet spot.

ConneXion Max™ technology amplifies energy transfer and offers an overall solid feel at contact. A new elastomer connector interlocks the handle to the barrel while eliminating vibration at contact.

Brand new OptiFlex Handle is designed to the exact specifications that elite high school and college athletes demand. Each handles' stiffness is optimized to the length and drop weight of each bat, directly enhancing feel and power output on every swing.

-------------------	----	----------	-------	-------	-------	-------	-------

A new direction for composite barrel technology is here with ROPE. First of it's kind, innovative 3D Rope Coil Composite closes the gap in performance between composite barrels and alloy barrels right out of the wrapper. 3D Rope Coil Composite provides the maximum allowed performance with no break in required.

- **3D Rope Coil Composite:** Easton's patented 3-dimensional composite rope is wrapped 360 degrees, vertically, around the center of the barrel at the sweet spot. Surrounded by optimized thickness composite sections toward the end cap and taper to maximize performance outside of the sweet spot, creating the widest max performance area across the entire barrel. This unique design governs performance set directly at the performance limit.
- **Swing Weight:** Light swing weight feel with a lower MOI, produces more bat speed and barrel control.
- **ConneXion Max™:** Utilizes an elastomer connector to interlock the handle to the barrel, eliminating vibration for optimal feel.
- **OptiFlex Handle:** Driven by ongoing research and feedback from some of the game's best players, each bat size's handle flex is specifically engineered to the elite BBCOR athlete.
- **Two-Piece Composite Construction:** Composite handle + composite barrel creates a larger barrel, with the biggest sweet spot and an unmatched feel.
- **Power Boost Soft Knob:** Provides hitters with more leverage, while reducing vibration and improving comfort for the bottom hand.
- **Flow-Tack Grip:** Comfortable and tacky grip for best feel and control.
- **Certification:** BBCOR

SPLIT

INSANE PERFORMANCE

THINNER ALLOY WALL.
BIGGER SWEET SPOT.
CRAZY POWER.

Easton's patented inner core technology is comprised of a high performance alloy barrel layered internally with lightweight composite. The CompCore™ allows for a 30% thinner alloy wall which creates an overall higher performing barrel across the entire sweet spot.

Connects the stiff composite handle to the aluminum barrel allowing the handle and barrel to act independently, eliminating vibration and maximizing energy transfer.

The unique two-piece hybrid design is highly sought after by elite BBCOR athletes for its powerful barrel and stiff handle. The Split Hybrid offers a slight end load and a massive barrel for more power.

This one of a kind hybrid bat combines aluminum and composite within the barrel to finely tune barrel performance. CompCore™ technology and a thinner alloy walls creates the maximum allowed performance over a larger area of the barrel; while a slightly end loaded swing weight and stiff feel all together delivers maximum power.

- **CompCore™:** Easton's patented inner core technology combines lightweight composite with the strength of the highest performance alloy. CompCore™ allows for a 30% thinner alloy wall compared to competitors, creating a higher performing barrel.
- **Swing Weight:** Slight end load feel with mass focused in the barrel for more power.
- **PureLynk CXN™:** Connects the handle directly to the barrel allowing the handle and barrel to act independently, eliminating vibration and maximizing performance.
- **Pro-Stiff Carbon Handle™:** Designed with extra-stiff carbon fibers to create a more-solid handle, giving the elite athletes a stiffer feel.
- **Two-Piece Hybrid Construction:** Composite handle with alloy + composite-lined barrel, designed with a stiff handle and powerful barrel.
- **Power Boost Soft Knob:** Provides hitters with more leverage, while reducing vibration and improving comfort for the bottom hand.

TECHNOLOGY

WHAT IS ARTIFICIAL INTELLIGENCE (AI)?

In its simplest form, artificial intelligence (AI) is a field, which combines computer science and robust datasets, to enable problem-solving. It also encompasses sub-fields of machine learning and deep learning, which are frequently mentioned in conjunction with artificial intelligence. These disciplines are comprised of AI algorithms which seek to create expert systems which make predictions or classifications based on input data. (Source: IBM.com)

HOW CAN AI HELP MY SWING?

Whether it's your batting average or swing velocity, baseball is a game of numbers where the smallest variance can make the biggest difference. Working with the most technologically advanced and skilled experts in this area, Rawlings has pioneered new breakthroughs in bat construction that will directly correlate to improved offense. Our patent pending AI technology utilizes a system of supercomputers to develop and evaluate thousands of inner wall variations. The result is the most optimal, finely tuned barrel design made to date. This process results in increased precision and consistency to ensure you're getting the most out of each bat.

OUTER BARREL

INNER BARREL

THE LOWEST BARREL COMPRESSION IN USSSA BASEBALL

DOUBLE BARREL

The thin, low compression outer barrel allows more barrel flex across the length of the entire barrel while the inner barrel governs performance so the bat performs as close to the USSSA 1.15bpf limit as possible. All of this results in harder and more consistent contact.

CONNEXION Max

ConneXion Max™ technology amplifies energy transfer and offers an overall solid feel at contact. A new elastomer connector interlocks the handle to the barrel, virtually eliminating all vibration at contact.

OPTI-FLEX HANDLE

Brand new OptiFlex Handle is designed to the exact specifications elite travel ball athlete demand. Each handle's stiffness is optimized to the length and drop weight of each bat, directly enhancing feel and power output on every swing.

- **2X Double Barrel Construction:** Easton's patented double barrel technology combines a lower compression outer barrel with a lightweight and durable inner barrel. The outer barrel provides more barrel flex across the length of the entire hitting surface and the inner barrel governs performance directly at the performance limit. This revolutionary technology results in the lowest barrel compression of any USSSA bat, with more barrel flex and a higher performance across the length of the entire barrel.
- **Swing Weight:** Balanced design feel, best for all players who want maximum bat speed and performance
- **ConneXion Max™:** Utilizes an elastomer connector to interlock the handle to the barrel, virtually eliminating all vibration for optimal feel

WOOD PROFILE GUIDE:

Choosing the profile of a wood bat that fits your strengths, your swing path, and your bat speed shouldn't be a difficult task. Rawlings has developed a simple guide to steer you into the right profile based on the unique attributes of each profile offered:

SWEET SPOT: What makes each profile unique is generally the diameter and length of the barrel. A larger flat barrel will offer the hitter the most forgiveness when not squaring a pitch up.

POWER: Each profile inherits a wood density which contributes to the hardness of the barrel and the velocity in which a ball comes off it. In short, the higher the density, the higher the exit velo. Density and Sweet Spot work together to help maximize your exit velo.

SWING WEIGHT: As a player's strength and hand speed develops, choosing a bat that swings heavier will maximize exit velocity when squaring up a pitch. On the contrary, choosing a lighter swinging bat will maximize barrel speed allowing a hitter to barrel up a ball more consistently.

Big Stick Elite

BIG STICK ELITE WOOD BATS

The heritage of Rawlings wood bats has always centered around a player's identity and choice of lumber as carrying a 'Big Stick'. Players past and present have trusted the Rawlings Big Stick to outperform its competition. The Big Stick Elite collection of wood bats seamlessly combine the heritage of trusted profiles and design with the elite performance a hitter demands.

DOUBLE EXT BARREL

SONIC COMP MAX

VRS 1

Easton's revolutionary Double Barrel EXT design provides a 1" longer sweet spot with the highest allowable performance across the entire hitting area.

Easton's highest-performing composite material, resulting in maximum performance with the lowest barrel compression and iconic sound heard across all fields.

Reverse-engineered internal connection point creates the feeling of a 2-piece bat, minimizing vibration and optimizing performance. The lightweight design alleviates extra weight in the taper in order to create a longer barrel.

Ghost® Unlimited -8	END-LOADED DOUBLE BARREL EXT DESIGN	FP23GHUL8	33/25	34/26			

- **Double Barrel EXT** - 1" longer Double Barrel EXT design provides the highest allowable performance across an even larger hitting area, creating an even bigger sweet spot
- **Sonic Comp™ Max** - Easton's highest-performing, even more durable composite, resulting in maximum performance with the lowest barrel compression and iconic sound heard across all fields
- **VRS1** - Lightweight reverse-engineered internal connection point, where the inner barrel meets the outer barrel, alleviating weight to further optimize performance across an even longer barrel, while also minimizing vibration on mishits
- **Power Boost™ Soft Knob Technology** - Provides hitters with more leverage, while reducing vibration and improving comfort for the bottom hand
- **Flow-Tack™ Grip** - Easton's most-premium grip provides the ultimate combination of cushion and tack.

THE BAT THAT CHANGED THE GAME... JUST GOT BETTER

SUPERIOR PERFORMANCE.
ENHANCED DURABILITY.
ICONIC SOUND.

DOUBLE BARREL

Patented Double Barrel construction is the standard in barrel construction innovation. The low compression outer barrel and durable inner barrel work together to provide a massive sweet spot with maximum pop.

CONNEXION

Improved barrel to ConneXion™ durability without sacrificing performance, while maximizing energy transfer and eliminating vibration.

SONIC COMP

Easton's Sonic Comp™ technology is meticulously designed with the lowest barrel compression and more durability, resulting in superior performance and iconic Ghost sound.

Compression refers to the pounds of force (lbs) necessary to compress the ball ¼ inch.

RED DOT® 3-PIECE TECHNOLOGY

A step above competitor's 2-piece softballs: that is why the best players in the nation choose Rawlings. The inner core uses Rawlings' proprietary dense cell formulation, creating a ball worthy of being the Official Championship Softball of the NCAA® and NAIA®. With the addition of the C-LOK™ adhesive and moisture barrier, the improved pro-leather cover with just the right amount of tack, there is no wonder why Rawlings has a rich tradition in fastpitch softball.

Balls without Rawlings' C-LOK™ and poly-core combination can absorb moisture and lose compression (get softer).

C-LOK™ plus Rawlings' proprietary dense cell poly-core technology repels moisture and maintains higher compression.

DREAM SEAM® HIGH-DENSITY CORK

For teams wanting the distinctive sound and feel of cork, Rawlings offers a complete line of NFHS®, ASA®, USSSA®, NSA® and ISC™ cork game balls. Made of high-density cork and Rawlings' patented Dream Seam® Technology, they offer the performance you demand while giving a lower cost option in game balls.

RIF® TRAINING BALLS

Rawlings was the originator of RIF® balls designed to reduce the severity of ball impact injuries. Since the original RIF® game balls, Rawlings has expanded its offering to practice-level soft-training balls. These products are great for outdoor as well as indoor training.

REDUCED INJURY FACTOR

Rawlings is the creator of the RIF® softball and all are NOCSAE® approved. All RIF balls reduce bat denting, especially in cold weather when balls get harder.

BENEFITS

- Reduces bat denting
- Enhances skill development
- Reduces fear of ball impact due to lower compression specifications of the ball
- Can lower team insurance rates
- Does not change the game

Every practice, every game - there's endless action to take in. Fast pitch athletes need a helmet and face mask that allows them to fully visualize each play resulting in maximum on-field performance. Now, success is made clearer than ever with the all-new high-visibility softball helmet from Rawlings! With a 30% percent larger viewing window than traditional helmet/facemask combos, and a stainless-steel cage with optimal, varied thickness, this newly engineered design will ensure you see and experience the game like never before!

Most gloves are made with six separate lacing sections: webbing, fingers, pocket, heel, thumb, and small finger. This pack contains enough lace to completely re-lace most gloves.

EACH GLOVE RE-LACE PACK CONTAINS:

* Some larger catcher's mitts, first baseman's mitts, and certain Trap-Eze style gloves may require an extra pack.

WASHING GUIDE

WASH UNIFORMS PRIOR TO FIRST USE AND IMMEDIATELY AFTER EACH USE. Naturally occurring PH levels in sweat may cause dye migration in first use. We recommend a detergent like Tide® Plus Coldwater Clean. Prior to washing in cool water, turning the garments inside out will help preserve Twill, Vapor Fusion™, HS Fusion, and Embroidery. Claspings Velcro® prior to washing may help prevent snagging or picking.

DO NOT WASH UNIFORMS WITH OTHER ITEMS. Bleeding may occur.

DO NOT USE BLEACH. Bleach will deteriorate fabric fibers and may cause color loss.

DO NOT OVERLOAD WASHER OR DRYER. Hang dry is recommended for best results. In the dryer, overloading may cause the uniforms to stick together, especially those with HS Fusion. Remove garments immediately after both wash and dry cycles. To avoid static and lint build-up, use an anti-static agent such as Bounce® Dryer Sheets.

DO NOT EXPOSE UNIFORMS TO HIGH HEAT. Excessive heat is the enemy of your uniform. Heat presses, ironing, dry cleaning, or heat transfers may cause dye migration and break down fabric fibers. Excessive heat, especially in dryers, can cause shrinkage above normal tolerances, cause HS Fusion to crack, and Twill to wrinkle. If you use a dryer, please use a 'damp dry' or 'air dry' setting.

STORE IN A COOL, DRY AREA, AWAY FROM DIRECT SUNLIGHT.

Excessive sunlight may cause discoloration.

Heavily soiled garments (grass, dirt, clay mud), pre-treatment is recommended

Spray on products such as Spray 'n Wash®, Shout®, or ESPRO® cleaner have been tested with positive results.

Products such as Shout® Advanced Action Gel can be used for stubborn stains.

For blood stains, it is best to rinse in cool water as soon as possible, and if necessary, soak in cool water before washing. One of the above pre-treatments can also be used, or an oxygen-based laundry booster such as OxiClean® can also be used.

For ink stains, use hair spray as soon as possible. Delaying the application of hair spray may decrease results. Spray on stain and rub until the ink is gone. Wash as normal.

QUALITY GUARANTEE

1-year warranty starts from date of customer receipt of uniforms. Warranty covers any defect or condition of a uniform that can be attributed to a manufacturing error, or otherwise deemed to be a quality concern. This does not include damage or discoloration that may occur from excessive collisions or abrasions, customer alteration, improper care, or circumstances beyond our control. Please use the above uniform care instructions for best results.

Our caring service representatives are standing by for your questions at 1-800-729-5464 (800-RAWLINGS).
